PROFESSIONAL SUMMARY

Computer Science and Business Systems undergraduate with strong programming skills in Java .Experienced in web development using HTML, CSS, JavaScript and familiar with MySQL, MongoDB and version control tools liersion control tools like Git and GitHub. Enthusiastic about building scalable software and applying data-driven thinking in full-stack development environments.

EDUCATION

- **B V Raju Institute of Technology, Narsapur** *2027-Present*
  Bachelor of Technology in Computer Science and Business Systems CGPA: 8.83
- **Kamala Nehru Polytechnic for Women , Hyderabad** *2021-2023*
  State Board of Technical Education and Training CGPA: 9.59
- **Gowtham Model High School , Hyderabad** *2021*
  Council for the Indian School Certificate Examinations, Telangana *CGPA:10*

SKILLS

Technical Skills: **Java Programming,** Basic **Python**
Web Development: HTML, CSS, JavaScript
Operating Systems: Windows | **Database Management Systems**: MySQL
Tools: Git, GitHub
Languages Known: English, Hindi, Telugu

PROJECTS

- **Blood Bank Management System** *Dec 2022*
  Built a machine learning tool to detect and visualize real-time stock market anomalies using financial indicators and unsupervised algorithms.

GitHub Link : Blood Bank Management System

– Tools & technologies used: Python, Django framework.
– The Blood Bank Management System is a Python-based application designed to streamline blood donation, storage, and distribution within a blood bank.
– The system ensures efficient tracking of blood inventories, donors, and requests, facilitating a smooth workflow for hospitals, blood banks, and individuals in need.

- **Captcha Generator** *Feb 2023*
  Built a Python-based CAPTCHA generator for web forms using PIL and random libraries to ensure secure user verification.

GitHub Link:- Captcha Generator

– Tools & technologies used: Python
– Designed to enhance web security by preventing automated bots from accessing restricted content or performing malicious activities.
– The generator produces a randomized string of characters and digits embedded within a dynamically generated image, making it challenging for bots to decipher.

CERTIFICATIONS

- Completed Certification from Datacom - Introduction to cloud job Simulation , AWS APAC - Solution Architecture
- ˙Completed Certification from HackerRank in Python.
- Completed Certification from NSIC Technical Service Centre in Java, Python, Linux, and Data Science.

EXTRACURRICULAR CONTRIBUTIONS

- **FINALIST ,PALS Innowah Competition,**2024
